Greetings,

For those who cannot or do not wish to spend time hydrating clay to make clay magma, this can now be purchased in 1 gallon containers:

Hydrated Clay.

This is made with our signature green desert clay. The water used is purified water (Reverse Osmosis) under 10 PPM dissolved solids. The water is then structured and properly re-mineralized just prior to hydration.

All clay is made to order, and ships out only on Mondays.

This is a fantastic "hydrated base clay" that can be used for any custom formulation, including to use with essential oils, apple cider vinegar, olive oil, etc.

There is enough clay in the one gallon container to fill 16 eight glass jars. For poultices, there is enough hydrated clay per 16 ounce glass jar for about 3 standard poultices using the Ayurvedic method of "a palm full" of clay.
